--- PORTFOLIO HEALTH SUMMARY ---

Total Target Value: \$22,000.00

Target Portfolio Sharpe Ratio: 1.91

Estimated Annual Dividends: \$136.45

Estimated Monthly Passive Income: \$11.37

Average Portfolio Yield: 0.62%

Diversification Note: A strict 10% maximum allocation cap has been applied to this portfolio. This forces the optimization engine to spread capital across a minimum of 10-15 distinctly uncorrelated assets, heavily reducing idiosyncratic firm risk while maintaining exposure to deep value FCFE generation.
